

Home Remodeling or Replacement Projects (permits):

Dear Residents,

If you're completing home remodeling or replacement/upgrade projects for your home, please make sure to obtain necessary permits and inspections from the Clinton County Building Department. This includes required plumbing, mechanical or electrical permits for items such as replacing a water heater, furnace, air conditioning or adding electrical circuits/service upgrades. If you are hiring a contractor to complete this work, make sure they obtain the appropriate permits and inspections. These permits and subsequent inspections are critical to make sure all work meets code requirements for your family's safety and to protect your investment.

For additional information or questions regarding permits, please don't hesitate to contact the County Building Department at 989-224-5181 or e-mail buildingdept@clinton-county.org
