

Broadband Update –

Based on the responses from our last Township survey, as well as the goals of our 5-year plan, The Victor Township Planning Commission has been diligently working on bringing fast, affordable, and reliable broadband internet access to all corners of Victor Township. The PC is pleased to report that Fiber cables are currently being installed throughout the Township and will provide many of the homes in our area with very fast internet in the coming years. Unfortunately, some homes in the Township (Especially those in more remote stretches) may not be getting fiber connectivity; In these cases, the PC is recommending the homes utilize Starlink Satellite internet, or a cellular solution provided by T-Mobile or Verizon. Planning Commissioner Dave Sell is happy to offer advice or answer questions regarding options for those homes that may not be covered by fiber, you can reach him at 517-202-1079.

To see if your home is slated to have fiber in the current project use the link below. Enter your address in the search box at the upper left corner. If your address shows as “Funded” and “Fiber” then your address is included in the current federal project and will have access to Fiber internet soon. <https://www.michiganbroadbandmap.com/map?zoom=6¢er=-9619763%2C5631121>

Lastly, please be on the lookout for the next community survey. This is the best way for residents to voice their wishes for township goals.
